

## RoHS II and WEEE Compliance

### RoHS II

RoHS II compliant means the absence of hazardous substances in a concentration higher than the tolerated concentrations defined by the EU directive (2011/65/EU) (0,1% for Hg, Pb, PBB, PBDE, Cr-VI and 0,01% for Cd).

We have started transitioning to RoHS compliant products in 2006 and the process of conversion is completed where possible. All products that are delivered now are RoHS II compatible.

The compliant products are marked as "RoHS compliant" on their product identification label.

### WEEE

We register Janz products which are brought into German market at the EAR, unless it is specified otherwise in contracts with customers.

We consider all our business as B2B. Our policy is that our customers are responsible for handling return and recycling of the Janz equipment.

Janz equipment has not to be deposited into public collecting point "öffentliche Sammelstellen".

For products that are imported into the EU market (except Germany) please contact our corresponding sales representative for more information.
