Product Highlights

Automation-Line AL i.MX8M Mini LTE, based on Arm® Cortex®-A53 and Arm® Cortex®-M4, completes the product range of existing Linux computers for DIN rail mounting. The intelligent gateway with LTE connectivity has extensive communication interfaces. With its robust housing, the gateway is ideal for demanding control tasks as well as mobile and wireless IoT solutions.

An outstanding feature is the LTE Cat1 module, which ensures a particularly reliable and fast connection for IoT applications. It is an excellent alternative when it is not possible to integrate the device into the company's own network. The AL i.MX8M Mini LTE comes standard with the secure, hardened Linux® based **KontronOS** operating system and **KontronGrid**, a comprehensive IoT-Device-Management Solution for Edge-Devices. This ensures the highest security standards and protection of sensitive data.

Client Benefits

❯ Compact, fanless design
❯ Flexible top-hat rail assembly
❯ Expandable via multifunction I/O module
❯ Attractive price-performance ratio

Applications

❯ Mobile solutions
❯ IoT-Gateways
❯ Edge Computing
❯ Mechanical Engineering
❯ Control
❯ Wireless Communication

About Kontron

Kontron AG is a leading IoT technology company. For more than 20 years, Kontron has been supporting companies from a wide range of industries to achieve their business goals with intelligent solutions. From automated industrial operations, smarter and safer transport to advanced communications, connectivity, medical, and energy solutions, the company delivers technologies that add value for its customers. With the acquisition of Katek SE in early 2024, Kontron significantly strengthens its portfolio with the new GreenTec division, focusing on solar energy and eMobility, and grows to around 7,000 employees in over 20 countries worldwide. Kontron is listed on the SDAX® and TecDAX® of the German Stock Exchange.
